cojocaru.co.uk

A JavaScript developer currently focusing on the MERN stack (MongoDB, Express.js React and Node.js). I have wide range of interests, including Design Systems, Web Accessibility, APIs and serverless technologies, such as AWS, MS Azure and Google Cloud.

WORK HISTORY

Manager @ Piquaboo Ltd

2013 - 2022

Owner, director, manual worker and everything in between for an e-commerce business centred around a home décor private label.

This was an extraordinary opportunity to develop and perfect a wide range of skills from brand development and product management to teamwork and client relations, as well as creative design, marketing, SEO, negotiation techniques and due diligence.

Having to deal with the complexities of international commerce and data in general, I have developed my own digital solutions for bookkeeping and inventory management, mostly via Excel and VBA.

Sabbatical

2022 - 2023

Some health issues convinced me it is time to move on. I closed the business, took a wellness break, and now I am gradually switching to a field which has been absorbing my interest for quite a while.

COURSES AND CERTIFICATIONS

School of Code

Sept - Dec 2022

A boot camp focused on the PERN stack.

The Complete SQL Bootcamp

completed Jan 2023

A PostgreSQL course on Udemy

MongoDB Node.js Developer Path

completed Jan 2023

Official training path provided by MongoDB

Agile Scrum Mastery

ongoing

Udemy training course for a level 1 Professional Scrum Master certification (PSM I). Can be complemented with the official certification.

OBJECTIVES

Become fluent in JavaScript and the processes and techniques involved in creating and delivering a project. Acquire DevOps competencies and enlarge my skill set with additional JavaScript frameworks, new languages such as Python and Rust and an in-depth knowledge of back end and cloud technologies as well as design systems.

SKILLS

Core competencies

JavaScript (ES6), TypeScript, React, Node.js, Express.js, MongoDB, PostgreSQL, CSS

Tools

Git, OpenAPI, RAML, ESLint, a11y, Google Screen Reader, Vite, Vitest, OpenAI

Interests

Python, Rust, WebAssembly, Docker, Kubernetes, AWS, Microsoft Azure, Design Systems, Graph Databases, Vim, Bash, other JavaScript frameworks (Vue, Svelte, Angular), React Native, Swift

Other

VBA, Affinity suite, Google Analytics

SOFT SKILLS

communication, critical thinking, organisational, self-managing, time management, project management, methodical, concept design, creative strategy, due diligence

PROJECTS

I like to engage in complex, multi-faceted projects which can bring out everything my skills have to offer.

The Riddle Fiddle

lobot

Artifices.xyz

ListA (ongoing)

EDUCATION

Certificate in Higher Education, Linguistics, University of Manchester
